

LES MOTELS

LES MOTELS are a Psych Fuzz Rock band from Treviso (Italy), formed in 2019. Their sound lives somewhere between fuzz-drenched guitars and hypnotic psych rock, driven by a raw, instinctive identity that won't hide behind gimmicks or clichés. Their influences stretch from The Brian Jonestown Massacre, The Black Angels, Jesus and Mary Chain and Ty Segall to the darker, more visceral corners of alternative rock.

The four-piece lineup—vocals/guitar, guitar, bass and drums—writes and performs mostly original songs in English and French. Their music blends abrasive fuzz, obsessive grooves and electric tension with darker, slower-burning segments where repetition, reverb and space create an immersive psychedelic pull.

Garage urgency, post-punk energy and deep psychedelic textures coexist naturally in the band's songwriting. Rather than chasing perfection, **LES MOTELS** build songs around contrast, pressure and release, creating a sound that feels physical, unpredictable and unmistakably their own.

On stage, the band delivers an intense, tightly focused live show where volume, pulse and atmosphere constantly shift. Their goal is not to fit into a scene, but to carve out a distinct identity through uncompromising rock'n'roll.

RELEASES

Released in 2022, their debut EP **Chiens de Dieu** was recorded and mixed by Matt Bordin at Outside Inside Studio. In 2025 the band released the EP **Death Box**, recorded by Andrea De Marchi at Virtual Studio, alongside the live EP **Live at The Hours**, recorded in 2023. A full-length album is currently in the works, to be released by the end of 2026.

AWARDS

In 2026 **LES MOTELS** received the Jury Award at the Back! Music Festival, selected by a jury chaired by Marlene Kuntz's founder Cristiano Godano. The band was awarded for its distinctive songwriting, the quality of its artistic offering and passionate live performance.
